DETAILED ACTION

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Applicant has submitted a copy of the signed oath from the parent application. However, the specification submitted was not a copy of that of the originally filed parent application. Applicant submitted a substitute specification with changes to the specification and claims. As such, this oath is improper.

Specification

The substitute specification filed 11/25/03 has not been entered because it does not conform to 37 CFR 1.125(b) and (c) because:

The statement as to a lack of new matter under 37 CFR 1.125(b) is missing.

It is further noted that the substitute specification submitted strikes through claims and renumbers claims. This is in contradiction to 37 CFR 1.126 which states that the original numbering of the claims must be preserved throughout prosecution.

See also MPEP 608.01(q).

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Art Unit: 1647

I. Claims 1-26, drawn to a method of inducing cell differentiation or preventing neuronal cell death, classified in at least Class 514, subclass 12, for example.

II. Claims 27-30, drawn to a method for identifying neutralizing activity, classified in at least Class 514, subclass 12, for example.

The inventions are distinct, each from the other because of the following reasons:

Although classified in the same class and subclass, the methods of the two groups can be shown to be distinct because the methods have different goals, method steps, and starting materials and thus require non-coextensive non-patent literature searches. Furthermore, group I includes both in vitro and in vivo applications and group II is directed to in vitro assaying. Thus, searching and examination of these groups together would pose an undue burden.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter and the necessity for non-coextensive literature searches, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
